HISTORY
TRUSTED INDUSTRY LEADER FOR OVER 75 YEARS

For the past 75 years, BAUER compressors has stood the test of time for the highest level of performance, quality, safety, and innovation. All BAUER compressors are designed and manufactured in-house with complete control of every step to ensure that BAUER’s uncompromising standards for ultimate performance, unmatched reliability, highest durability, and lowest cost of ownership are met. At BAUER, we are well known for our high-tech precision manufacturing and quality process, resulting in products that outperform and outlast any other compressor brand on the market today.

INNOVATION
ULTIMATE PERFORMANCE AND RELIABILITY

At BAUER, we are committed to providing our customers with the most technologically advanced products in the world. Only the latest CAD and finite element calculation programs are used in the design of each product. To maintain our technological edge, BAUER reinvests a large portion of corporate earnings back into R&D. Simultaneously, we draw on our more-than-a century of machine building heritage to advance our causes for the future. The result: products which are built to attain the highest standards of performance and reliability.

QUALITY
LOWEST COST OF OWNERSHIP

At BAUER, our world-renowned quality is a result of being vertically integrated. We maintain control of the entire production process, starting from R&D, to engineering & design, and to manufacturing & assembly. Only the highest-grade materials and state of the art precision manufacturing methods are used in the making of each compressor. To ensure consistent quality throughout, our entire manufacturing process, from the compressor to complete system, is ISO9001 certified. Every unit is put through rigorous testing by our QC department before release from our factory for shipping. The result: a highly-reliable product that keeps on performing with minimal cost of ownership.

HIGHEST QUALITY PRODUCTS AND SOLUTIONS FOR HIGH PRESSURE...

MISSION STATEMENT

Our mission at BAUER COMPRESSORS INC. is to provide the highest quality products and solutions for high pressure air and gas. We are committed to using the latest technology, best materials, most qualified human resources, and the most efficient fabrication techniques. As a result, our equipment solutions offer superior performance along with best value, and are delivered on time, defect-free and are supported to achieve their maximum potential throughout their entire lifecycle.
Helium gas has a density which is 86% less than air. This means that the compressors must be built to extremely tight tolerances to effectively compress the gas without excessive blow-by. Furthermore, helium releases large amounts of heat when it is compressed, which the compressor must be able to absorb and shed. BAUER’s water cooling technology meets these requirements with increased cooling efficiency, and our purpose-built helium compressors can accommodate some of the most difficult parameters.

Helium is similar to crude oil: there are plenty of deposits on Earth, but only in specific regions. In order to mitigate the widespread dependence on this element, BAUER helium recovery compressor systems assist in minimizing the waste of helium.

We are so confident in our quality that our helium systems are warranted for two years after the shipment date. This level of support is virtually unmatched in the industry.

All BAUER helium systems are supported by a nationwide network of BAUER factory trained technicians. We are available 24/7 for technical and spare parts support. We also offer remote monitoring of your system for early problem detection, to ensure the highest level of uptime and reliability for years to come.
G60-V He-SERIES
THE ALL-IN-ONE COMPACT HELIUM RECOVERY SOLUTION

BAUER has developed an all-new helium recovery system in an outstandingly compact design, in response to specific market demand. Standard systems which collect helium in bulky external gas balloons can be too big for certain applications. Hospitals, laboratories, and other medical facilities often work with small volumes of helium but have limited space. BAUER’s new G60-V system for helium recompression was designed specifically for cases like these.

The compact plug-and-play solution accommodates all of the system components in a neat vertical housing which minimizes the machine footprint. As a standout feature, the gas balloon for helium collection is dimensioned in alignment with the system output and directly integrated into the housing. An ultra-compact compressor block compresses the helium from the balloon to 200 bar (2900 psig). After passing through the integrated gas purification system, the compressed helium reaches a sufficient purity level for most applications. The system therefore makes an important contribution to conserving helium, a rare gas.

BAUER CONNECT® is an app and internet-based IoT solution which allows BAUER customers to remotely monitor - and control - the performance of the entire BAUER system through any wireless mobile device or computer, anytime, anywhere.

**Key Features:** allow customers to increase efficiency and productivity, save time, do more with fewer resources, enjoy lower operational costs, and have total flexibility with a solution tailored specifically for the end-user.

**BAUER CONNECT® - Connection that matters.**

**BAUER REMOTE HMI**

The BAUER Remote HMI function allows factory-trained technical personnel to remotely control the BAUER system via the BAUER CONNECT® App with the same functionality as if one were standing in front of the actual unit.

**MOBILE DASHBOARDS**

BAUER CONNECT® App will also display a real-time graphical display of the entire system (SCADA view). The Mobile Dashboard feature provides information such as compressor system status, error log, critical pressures and temperatures, and volume of air dispensed in storage information, etc.

**NOTIFICATIONS**

The BAUER CONNECT® Mobile App will send push notifications if certain critical parameters of the BAUER system fall outside of normal operating range or if triggered by a system alert. This assures that essential personnel is notified immediately, thus allowing for pro-active intervention in a situation that could potentially be detrimental to the BAUER system as well as the customer’s operation.

**BAUER REPORTS**

The BAUER Reports feature is a function that generates custom reports tailored to the specific needs of the customer. Customers can have access to historical data via a multitude of standard and customized reports.

**BAUER PREDICTIVE ANALYTICS**

This feature of BAUER CONNECT® provides a new pro-active dimension to perpetually maintaining customers’ compressor systems at peak conditions with minimum downtime. BAUER’s predictive analytics algorithm uses artificial intelligence to analyze the collected system information on the BAUER Cloud to predict upcoming maintenance requirements and preventative actions to avoid unplanned shutdowns.

**IOT REMOTE TELEMETRY AND CONTROL**

BAUER CONNECT® is a cloud-based IoT solution which allows BAUER customers to remotely monitor - and control - the performance of the entire BAUER system through any wireless mobile device or computer, anytime, anywhere.

**BAUER CONNECT® - Connection that matters.**

LIFECYCLE PERFORMANCE
BAUER is committed to the lifecycle performance of its customers

PARTS

OEM PARTS WARRANTY RAPID DELIVERY

QUALITY AND RELIABILITY
Our factory-original replacement parts assure you that when maintenance or repair is performed, you are restoring the unit to its original specifications and performance.

PARTS: COMPATIBILITY
We configure our designs with interchangeability and our end user in mind. You can count on parts being available for all BAUER models.
PartsSales@BauerComp.com or 1-(844)-500-5822

TRAINING

ON-SITE/OFF-SITE TRAINING FACTORY TRAINED TECHS

BAUER COMPRESSORS INC. offers a variety of on-site and off-site Training Schools. Our on-site classes are held at our BAUER Training Facility and are taught by the same people who help manufacture, test, and service our products. From electrical systems to hands-on breakdowns, we cover all areas of compressor operation.

TRAINING TOPICS
Basic mechanical theory and control system theory (electric and pneumatic), along with troubleshooting for all BAUER systems.
Class schedule and course registration at: www.BauerCustomerTraining.com

GLOBAL SERVICE

GLOBAL SERVICE REACH
FACTORY TRAINED TECHS

SERVICE AND SUPPORT
Our compressors are designed with you in mind. Easy-to-use manuals guide you through clear, mechanically-accessible repairs. Our worldwide distribution network was developed to assist in after-sales support, along with product and maintenance parts assistance.

FROM THE SOURCE
BAUER COMPRESSORS INC., is certified with ISO 9001:2015 quality processes providing you with confidence that cannot be duplicated by sub-standard after-market parts and service.

BAUER HELPDESK

24-7 PHONE TECH SUPPORT LIFECYCLE PERFORMANCE

TRAINING TOPICS
Total customer satisfaction is our top priority. BAUER provides 24-7 phone tech and troubleshooting support at our BAUER Helpdesk. Our support continues throughout our warranty period and beyond.

For BAUER Helpdesk please email: CustomerService@BauerComp.com or call at: 1-(844)-500-5822
